THE WEIGHT OF AMERICA'S BOARDS

Ranking America's Largest Corporations by the Governance Capacity of Their Boards

by

James J. Drury III and James J. Drury IV

OVERVIEW

Introduction

As we present our 5th *The Weight of America's Boards* report, a bit of reflection. Its introduction in 2011 was an attempt on our part to propose a thoughtful, analytical process by which the “governance capability” of America’s corporate boards could be assessed. With a 30-year history providing board counsel and recruiting board directors, we found ourselves on more than a few occasions being asked whether a particular board was either “good or bad” or “strong or weak”, whenever a well-known company found itself in significant difficulty.

In our professional role as a trusted board advisor, we always declined to comment. However, in many of these situations, we did have an opinion, primarily based on our professional experience and judgment, not fact-based knowledge. An informed opinion would have required first-hand observation of the process by which directors made critical decisions in the boardroom, over a sustained period of time – which is implausible given that board proceedings are highly confidential by necessity.

There are many significant factors that must be considered when evaluating the quality of a board director, and most of them are subjective: integrity, intelligence, judgement, commitment, collegiality, to name a few. **There is one factor, however, that can be assessed objectively that all directors should possess in equal measure: a high level of demonstrated accomplishment and acumen in their chosen field of endeavor.** As the role of a public board is to govern the performance of a business enterprise, we firmly believe that “business acumen” is the most essential quality of an effective board director. That fundamental belief provides the objective framework for our board assessment model.

Our methodology involves a calibration of a board’s “capacity to govern well”, which is based upon the

“weight” of combined business acumen present in the boardroom. The assessment of a board’s “quality”, without objective criteria, is little more than a subjective exercise. **However, we believe if a board possesses both a high “capacity to govern well”, and highly capable “boardroom leadership”, that is as close as one can get to having confidence that it is a good board, a strong board, and a quality board.**

With each publication of our report, our confidence in the value of our assessment model has been reinforced. Many of the boards assessed by our model have expressed their appreciation for the recognition they have received, acknowledging their good standing in the media and their annual reports. A good number of boards have also requested multiple copies of our report to share with their directors in order to discuss a strategy for strengthening their governance capacity. We would like to recognize, in particular, **Blackrock, PPG, and Parker Hannifin** for making our top 10 list in each of the five years that our report has been published.

Perhaps the strongest support for the rationale of our assessment model emerged recently in a research project conducted by our firm. In order to strengthen our professional insight regarding what makes a great board and a great director, **we were privileged to conduct in-depth personal interviews with 30 of America's most accomplished and respected board directors.** Together, their collective director experience has been gained in the boardrooms of 60 Fortune 500 companies, ranging in scale from the largest to the smallest. **One of the questions we asked was, “When you think of the most respected and effective directors that you have observed in the boardroom over the years, what are the most important characteristics that they have in common?”** With few exceptions, the most frequently mentioned characteristic was “high business acumen and achievement”, confirming our instincts.

We are pleased to share our 2016 board report. Its findings will provide a uniquely objective perspective regarding the governance capacity of the largest 500 companies by revenue, and the 500 largest companies by market cap (more than 600 leading public companies), and their 6,000+ board directors. Our report will also serve as an alternative point of view when considering the opinions voiced by shareholder activists and institutional investment advisors.

Background & Foundation

THE ROLE OF TODAY'S CORPORATE BOARD

Historically, a board's fiduciary oversight role has been defined as both powerful and limited, firmly grounded in the principles of corporate law and governance mandate. However, some prefer a simpler definition. In the words of one of America's most respected retired CEOs, and a director of Fortune 50 corporations, the role of a board is twofold: "*To determine who runs the place, and who owns the place.*"

The clear separation between the board's governance-oversight responsibility and management's decision-making responsibility is widely understood. Yet that distinction does not seem to satisfy those who hold boards accountable for almost every corporate failure, misstep, and transgression. The board seems to be viewed as the *conscience* of the public corporation. It is almost assumed that a board should have anticipated and prevented anything that goes awry.

A board's responsibility is complex and multifaceted. A board oversees management performance, safeguards the long-term health of the business, and represents the interests of shareholders. In addition, it must consider the interests of other company stakeholders: employees, pensioners, customers, suppliers, and the communities in which the company operates. As the governance role of boards continues to be under scrutiny and criticism by shareholder activists, the "**capacity to govern well**" becomes ever more important.

GOVERNANCE CAPACITY – WHAT IS IT?

The true measure of a board's governance capacity is its perceived ability, and courage, of its directors to understand complex business issues and take action. In examining a board's governance capacity, do its directors have the heft and seasoned experience to

step up to the plate? When it comes to business acumen, are they heavyweights or lightweights?

A fundamental premise of our report is that **we value business experience more highly than non-business experience in measuring governance capacity**. Our research shows that the more accomplished a director is in business achievement, the more likely that director is to engage the CEO, management team, and other directors in rigorous discussion regarding critical business issues. If there is any question about the value of business acumen, observe which directors lead in a crisis, and which directors follow.

TRENDS THAT CONCERN US

Based on our experience advising boards, there are a number of factors and trends that we believe will be detrimental to board governance capacity, unless they are reversed:

- A marked erosion of overall boardroom business acumen, as fewer of America's most accomplished business executives occupy boardroom seats.
- Growing public mistrust of corporate boards without deeper understanding of the board's role, leading to ever-increasing rules, regulations, and guidelines that weaken a board's decision-making ability.
- A long-observed propensity for shareholder activists, and some business journalists, to presume that boards are at fault whenever a corporation experiences difficulty.

Decline in Board Business Acumen

Much of the erosion in board service by business executives is the result of increased demands on directors' time, as well as board pressure on America's best business leaders (CEOs and top executives) to reduce their outside board commitments. The era of the over-boarded CEO is long behind us. In 1990, 70% of active Fortune 500 CEOs served on outside boards, filling 772 seats. In 2016, only 45% served on outside boards, filling only 266 seats – a 66% decline. We can assume that if CEOs are not serving on boards, their top executives aren't either. As a result, America's boards have experienced a significant "brain drain" of business acumen.

We disagree with shareholder activists who suggest that CEOs lack the time and independence to be effective directors. Many of America's board chairmen with whom we have spoken agree with our position: the greater the number of directors lacking

in business accomplishment, the weaker the board's grasp of key business issues, and the less effective the board's governance process.

It defies logic to suggest that governing complex businesses can be accomplished more effectively if America's most accomplished business executives are *not* present as independent directors in the boardroom. Rather, board chairmen believe that the greater the business acumen of a board's directors, the more likely they are to raise the right issues, challenge conventional thinking, and exercise leadership in a crisis.

THE NEED FOR DISPASSIONATE OBJECTIVITY

Public commentary on the quality of corporate boards is generally one-sided. Seldom does the public hear the perspective of respected professionals who have spent years in the boardroom as directors. The views most often heard are those of shareholder activists and institutional investment advisors; objectivity is not their stock in trade – their businesses are for-profit enterprises. Never have they singled out a board for exemplary performance, as there is little profit in doling out praise: no advisory fees earned for extolling a board's virtues; no proxy contests to be mounted; no shares to be tendered.

Where is the other side of the story? Why aren't the observations of board chairmen, directors, and CEOs being publicly expressed to corroborate the true successes of corporate governance that could serve as a model? There are several reasons:

- First, there is the necessity for confidentiality. Sharing privileged discussions regarding executive leadership effectiveness, business risks and opportunities, strategy, competitive threats, and key investments could aid competitors, destabilize stock performance, and break the trust between the board and management.
- Secondly, governance is both art and science. Its actual effectiveness is not easy to observe or measure while governance is taking place. In reality, a company's board processes might be conducted well, with good counsel being provided, issues being openly debated, and well-reasoned decisions being made. However, that is not the real measure of governance effectiveness. Effective governance can only be assessed months and years later, when the results of those decisions are known. Did the board's decision to change leadership, consummate an acquisition, or diversify globally result in improved performance and enhanced shareholder return, or

not? Effectiveness is measured best when looking backward at decisions previously made, not while observing them in the process of being made.

- Lastly, when boards become the target of criticism, even when completely unwarranted, the last thing they feel the need to do is escalate a "war of words" in the media.

If we accept the notion that shareholder activists and advisors cannot judge governance effectiveness objectively, that directors in the boardroom cannot freely defend themselves against criticism for reasons of confidentiality, and that the true measure of a board's effectiveness will only be known in the future, can there actually be an objective method to assess the quality of a board in the present? We believe there is.

A FRESH PERSPECTIVE

While "effectiveness" is a relative term and may be difficult to measure, we believe that an objective assessment is possible if one **measures a board's "capacity to govern well"**. A lower "capacity to govern well" will result in lower overall potential governance effectiveness. A high "capacity to govern well", combined with highly capable boardroom leadership, will maximize overall potential governance effectiveness, and thereby generate superior shareholder returns.

We hope that our governance study will be a voice for reason, one that will encourage shareholders to think twice when unfounded criticism is directed toward boards of "high governance capacity"; and by the same token, to be more attentive when concerns are focused on the performance of boards that have "low governance capacity".

Our "Business Acumen Weight" Valuation Methodology

As the "weight" of an executive's business acumen and accomplishments can be reasonably approximated, we have developed a method by which each director's weight, and the board's total weight, can be valued as a predictive indicator of a board's governance capacity.

While there are factors other than the weight of business acumen that could be considered in the assessment of a director's governance capacity (e.g.,

quality of experience in the boardroom, preparation for board meetings, time allocated, etc.), these factors are virtually impossible to measure and do not necessarily translate into effective governance capacity. However, the weight of a director's business accomplishment *does* lend itself to measurement, both objectively and subjectively, and the total weight of a board's directors is a factor unique to each board.

CALIBRATING BOARD WEIGHT

Drawing upon board feedback during a professional lifetime of experience evaluating America's most accomplished executives, we created a methodology by which business acumen weight values are awarded to directors, ranging from 1 to 10. The value is based on each director's level of business accomplishment in their principal career field, and the relative value boards currently place on that experience in the boardroom. A company's Total Board Weight is the sum of the weights of its individual directors.

CEO and/or Chairman experience is awarded the highest weight value for director governance capacity: 10. All other director weights are scaled

down from that weight. Weights are adjusted further downward in two circumstances: (1) if a director is retired from his/her principal career, and/or (2) the director is considered an insider.

- Boards tend to prefer active executives to retired executives, because they are thought to bring more currently relevant insight and experience to the boardroom. Therefore, while that view is not true in every case, retired executive weights are adjusted downward by 1 point, reflecting this general perception.
- Non-independent directors who have had a close affiliation with the company are deducted 3 points, recognizing that their personal interests might occasionally compromise the value of their judgment in the boardroom.

As the corporation's CEO is almost always a member of the board, we have excluded him/her from our board weight analysis. The intent of our system is to measure only the factors over which the board actively exercises control (e.g., board size and the experiential backgrounds of directors).

Director Weight Values			
10 Points		7 Points	3 Points
<ul style="list-style-type: none"> • Active Chairman or CEO 		<ul style="list-style-type: none"> • CEO - Company <\$500MM Revenue • Chief Financial Officer • Chief Administrative Officer • Group/Division/Subsidiary President • Non-CEO Banker • CEO - Hospital 	<ul style="list-style-type: none"> • Academic - Dean/Professor • Exec - IT/Science • Exec - Investor Relations • Exec - Communications/PR

Quick-Take Analysis

At this point, it might be helpful to provide a quick overview of our study before presenting the body of our 2016 report. In addition to highlighting the companies that distinguished themselves, we will share a number of key observations and interesting trends.

BOARD SIZE TREND

Average board size increased from our last report – from 9.6 to 9.7 directors in 2016. Median board size also increased from 9 to 10 directors. **CME Group** repeats as the largest board with 22 directors; in 2014 it had 23. The smallest boards are **Travel Centers of America** and **Microchip Technology**, with 4 directors.

The board that expanded the most this year is **Oaktree Capital Group**, adding 6 directors. Those that contracted the most are **PPL**, **Freeport-McMoRan**, **Western Digital**, and **Williams Companies**, all down 5 directors.

BOARD SIZE CONSIDERATIONS

If you are interested in how the size of your board compares to others, the boards of America's largest companies sort by quartile into the following ranges:

Board Size Distribution By Quartile

of Directors

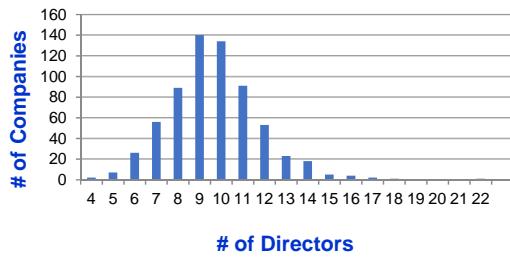

Top Quartile	11-22
2 nd Quartile	10-11
3 rd Quartile	8-10
Bottom Quartile	4-8

The distribution of all boards by size is as follows:

Board Size Distribution By # of Directors

<u># Directors</u>	<u># Boards</u>	<u>%</u>
4	2	0.3%
5	7	1.1%
6	26	4.0%
7	56	8.6%
8	89	13.7%
9	140	21.5%
10	134	20.6%
11	91	14.0%
12	53	8.1%
13	23	3.5%
14	18	2.8%
15	5	0.8%
16	4	0.6%
17-29	4	0.6%
	652	100.0%

Board Size Distribution

COMPOSITION OF TODAY'S BOARDS

There is no ideal standard for the composition of a board, no formula. Boards are like snowflakes – no two are identical.

Question: Who are the directors who populate America's boards? What are their qualifications and backgrounds? Do they tend to be from industrial corporations, professional services, or academia?

Answer: Consistent with our earlier reports, corporate executives with P&L experience still account for the greatest number of board seats – 3,499 seats, or 55.5% of all seats. Corporate Staff Executives (CFOs, CAOs, CHROs, CMOs, and General Counsels) account for the second largest group with 914 board seats (14.5%). The smallest professional group represented on America's boards are “non-mainstream industry” executives (advertising, media, publishing, real estate, and sports executives) with 83 seats (1.3%).

Distribution of Director Board Seats By Business Acumen				
<u>Group</u>	<u># of Board Seats</u>	<u>% of Total</u>	<u>Change from 2014</u>	<u>Cumulative %</u>
P&L Executives	3,499	55.5%	-2.0%	55.5%
Corporate Staff Executives	914	14.5%	+2.4%	70.0%
Outside Financial Advisors	877	13.9%	+0.7%	83.9%
Other Outside Professional Advisors	386	6.1%	-0.7%	90.0%
Academics	274	4.3%	0.0%	94.3%
Government/Military	180	2.9%	-0.3%	97.2%
Non-Profit Executives	84	1.3%	-0.2%	98.5%
“Non-Mainstream Industry” Executives	83	1.3%	0.0%	99.8%
No Professional Affiliation	7	0.1%	-0.1%	100.0%
	6,304	100.0%		

For a finer understanding of the cross-section of America's directors, we analyzed each director's background against 37 business acumen categories. CEOs account for the greatest number of board seats, 2,131 or 33.8%. Group/Division/Subsidiary Presidents were the second most prominent category with 684 seats, or 10.9%. Ten business acumen categories account for 79% of all board seats, as noted below. (A complete ranking of all 37 business acumen categories can be found on page 46.)

Distribution of Director Board Seats Top 10 and Bottom 10 Business Acumen Categories					
<u>Top 10 Acumen Categories</u>	<u># of Board Seats</u>	<u>% of Total</u>	<u>Bottom 10 Acumen Categories</u>	<u># of Board Seats</u>	<u>% of Total</u>
CEO	2,131	33.8%	Hospital Executive	33	0.5%
Group/Division/Subsidiary President	684	10.9%	Human Resources	29	0.5%
CFO	507	8.0%	Sports & Entertainment	21	0.3%
President/COO/Exec - Operations	368	5.8%	Publishing Executive	13	0.2%
Chairman	316	5.0%	Trade Association Executive	12	0.2%
Private Equity Investor	254	4.0%	Gov. Relations/Public Policy	7	0.1%
Investment Manager	248	3.9%	No Professional Affiliation	7	0.1%
Investment Banker	187	3.0%	Real Estate Executive	6	0.1%
Accountant	151	2.4%	Religious Leader	2	0.0%
Government Official	136	2.2%	Museum Executive	1	0.0%

ACTIVE VS. RETIRED EXECUTIVES

The majority of the 6,304 board seats analyzed are filled by directors retired from their principal careers – 3,681 seats (58%), versus 2,623 (42%) who are still active. The categories with the greatest proportion of directors still active in their careers are private equity investors (90%), venture capitalists (90%), and academic professors (84%). Excluding those who cannot serve while active (public accountants, military officers, and elected government officials), the director categories with the smallest proportion of active professionals are Chief Administrative Officers (21%), Treasurers (22%), and Non-CEO Bankers (23%). In terms of directors who are CEOs and CFOs, 30% and 28% are active, respectively. It should be noted, however, that many retired executives joined their boards as active executives, and retired subsequently.

CEO BOARD SERVICE TREND

Since our first governance study in 2011, and after a prolonged decline that began 23 years ago, CEOs appear to be returning to board service. Examining the 554 boards common to this and our 2014 report, the number of board seats filled by CEOs (active and retired) increased from 1,839 to 1,901, up 3.4%. Board seats filled by active CEOs increased 1.9%, from 566 to 577; while those filled by retired CEOs increased 4.0%, from 1,273 to 1,324.

WHERE ARE THE FINANCIAL EXPERTS?

Boards are required by the SEC to have an audit committee staffed by independent directors, and at least one of those directors must qualify as a “financial expert”, as defined by the SEC – one who understands generally accepted accounting principles and has experience performing, executing, analyzing, and/or evaluating financial statements. Given the importance of the audit committee role, one would expect most committee members to be financial experts. However, of the 2,673 audit committee directors assessed in our report, only 62% (1,646) are designated as financial experts. The average shareholder probably believes that most financial experts are CFOs or public accountants, but nothing could be further from the truth.

So, who are these financial experts?

Of the 1,646 designated financial experts, our research revealed that only 49% (803) have CFO or public accounting backgrounds. What are the backgrounds of the remaining 51% (843)? The answer may surprise you.

The Population of “Financial Experts” Who Are Not CFOs or Public Accountants

	# of Dir.	% of Total Financial Experts
P&L Executives	531	32.3%
Bankers & Financial Advisers	176	10.7%
Other Non-CFO Corporate Staff Executives	59	3.6%
Academics	30	1.8%
All Other	<u>47</u>	<u>2.9%</u>
	<u>843*</u>	<u>51.3%</u>

* Total # of Financial Experts = 1,646

It is remarkable that P&L executives account for one-third of the designated financial experts on board audit committees. Only 9% of active CEO directors have earlier CFO experience. While bankers and financial advisors certainly have financial expertise, their backgrounds would seem more appropriate for a board’s finance committee than its audit committee.

A Significantly Untapped Resource

Our study indicates that 536 (82%) of the boards analyzed do not have an outside active CFO as a director. Of the 6,304 board seats analyzed, only 124 (2%) are filled by outside active CFOs. Even more surprisingly, of the 1,646 financial experts, only 88 (5.3%) are outside active CFOs. Retired/Former CFOs fill another 493 financial expert seats, bringing CFO representation to 581 (35%) of all financial experts. Directors with public accounting backgrounds fill another 214 financial expert seats, bringing the total CFO/public accountant population to 795, or 48% of the financial expert population.

We are concerned that boards are undervaluing the disciplined financial perspective that CFOs and public accountants can bring to boardroom deliberations. When we ask boards about the underrepresentation of CFOs, most often the reply is, *“If we were to consider a CFO for our board, he/she would have to have a broad-gauged, strategic business mindset, not a corporate controller perspective – perhaps a CFO who is now, or might become, a CEO.”* We certainly agree with the strategic mindset, but in our experience, todays CFOs are not the green eyeshade, risk-averse bookkeepers of yesteryear; they can grasp the big picture. We encourage boards to challenge conventional thinking in this regard.

Directors designated as “financial experts” should truly be “independent financial experts”, not just professionals who qualify simply because they work in the finance industry, or are P&L executives who have had a finance department reporting to them.

The Opportunity to Strengthen Board Financial Expertise

There are 59 public companies in our study that do not appear to have a director with CFO or public accounting experience on their boards. The 10 largest of these companies are shown below.

10 Largest Companies with No CFO or Public Accounting Experience on Board*

Company	Revenue (\$B)
CVS Health	\$ 149.2
Hewlett-Packard	106.0
Amazon.com	100.6
Comcast	73.0
Caterpillar	50.2
Coca-Cola	45.2
Energy Transfer Partners	40.0
United Continental	38.1
American Express	35.2
Starbucks	19.2

*As of July 2016.

Current Status of Board Diversity

When the value of board diversity is discussed in the broader context, it is commonly acknowledged that, at its core, it is diversity of thought, perspective, and expertise that really matters. However, seldom is passionate debate devoted to assuring that boards adhere to that standard. The greatest focus of attention continues to be on the diversity of a board's composition in terms of gender and ethnicity.

Our report provides an update on gender and ethnic diversity, in order to provide a rare glimpse of the complete diversity picture in the governance space.

It may come as a surprise to many that America's boards are more diverse than they might have imagined. Approximately 32% of the 6,304 board seats analyzed in this report are held by directors of gender and/or ethnic diversity. **This represents a 10.3% increase since our 2014 report.**

OVERALL BOARD DIVERSITY COMPOSITION

Our analysis indicates that white males constitute 68.4% of board seats, and white females occupy 17.2%. Non-white males constitute 10.7%, and non-white females account for roughly 3.6%. **The proportion of white males declined from 70.6% in 2014. And, while the proportion of non-white males and females grew meaningfully, the greatest proportional growth occurred among white females, increasing 10% since our last report.**

Composition of Board Seats

General Race	Male		Female		Total	
	#	%	#	%	#	%
White	4,315	68.4%	1,086	17.2%	5,401	85.7%
Non-White	674	10.7%	229	3.6%	903	14.3%
Total	4,989	79.1%	1,315	20.8%	6,304	100.0%

The overall ratio of board seats held by males to females is 3.8:1. By white males to white females is 4.0:1. And by non-white males to non-white females – 2.9:1. Enriching a board's diversity usually translates into growing the percentage of females and non-white males serving as directors; the following chart indicates that approximately 32% of board seats are filled by diverse directors.

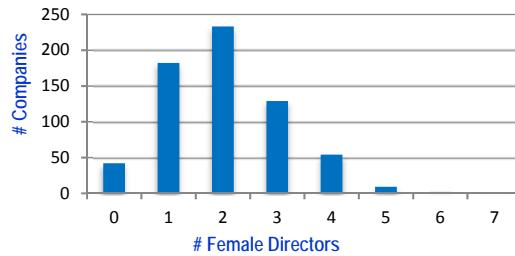

Diverse Board Seats

	# of Seats	% of Total Seats
Females (White)	1,086	17.2%
Males (Non-White)	674	10.7%
Females (Non-White)	229	3.6%
Total	1,989	31.5%

DIVERSITY BY GENDER

1,043 individual female directors serve on the 652 boards analyzed. This is an increase of 121 seats, or 13%, since our last study. These female directors occupy 1,315 board seats, or 21% (previously 19%) of the 6,304 board seats analyzed, an average 1.3 board seats per female director. The number of boards that did not have a female director decreased from 51 to 42, down 17.6%. The boards that have female directors averaged 2.2 per board. The top three boards in terms of female director representation are **Wells Fargo** (7 female directors), **Estée Lauder** (6), and **Macy's** (6).

Population of Female Directors

Women who have senior-level executive experience occupy the most board seats – 837, or 63.7% of the total female director population. CEOs, Presidents, COOs, CFOs, and Group Presidents make up the

bulk of that group. These female directors represent 13.3% of the total director population, or one seat on an average board of ten directors. (*A complete breakdown of female directors by business acumen category can be found on page 46.*)

The industry sectors with the greatest number of female directors are Financials (266 directors), Consumer Services (234), Industrials (167), and Consumer Goods (157).

Female Director Representation by Industry				
Sector	# Cos. in Sector	Cos. with Female Directors	# Female Board Seats	Average # Female Directors
Telecommunications	13	100%	30	2.31
Consumer Services	102	96%	234	2.29
Financials	120	97%	266	2.22
Consumer Goods	71	94%	157	2.21
Utilities	34	97%	75	2.21
Healthcare	56	98%	118	2.11
Basic Materials	43	98%	82	1.91
Industrials	91	95%	167	1.84
Technology	70	91%	123	1.76
Oil & Gas	52	69%	63	1.21

Interestingly, the composition of the female board population by area of business acumen is markedly different from that of the male population. The percentages may differ because males might simply outnumber females in the experience categories that appear to be the most desirable for director talent. (*A more detailed analysis can be found on page 46.*)

Board Seat Representation by Gender				
	Males		Females	
	#	% of M	#	% of F
Corporate P&L Executives	2,975	59.6%	524	39.8%
Corporate Staff Executives *	601	12.0%	313	23.8%
Financial Advisors	711	14.3%	166	12.6%
Professional Advisors *	294	5.9%	92	7.0%
Academia *	189	3.8%	85	6.5%
Government / Military *	123	2.5%	57	4.3%
Non-Profit *	40	0.8%	44	3.3%
Other	56	1.1%	34	2.6%

* Females have higher percentage.
Green indicates an increase from last year.
Red indicates a decrease from last year.

DIVERSITY BY ETHNICITY

702 directors of ethnic diversity occupy 903 board seats (14.3%) of the 6,304 board seats analyzed, an average of 1.4 seats per ethnic director, compared to 1.2 seats per white director. Black and Hispanic directors occupy the largest share of ethnic board seats – 669 (74.1%).

Racial and Ethnic Composition					
Race	# Directors	% of Non-White Directors	# Seats	% of Non-White Seats	% of Total Seats (6,304)
Black	328	46.7%	462	51.2%	7.3%
Hispanic	168	23.9%	207	22.9%	3.3%
Asian	108	15.4%	123	13.6%	2.0%
Indian	71	10.1%	79	8.7%	1.3%
Middle Eastern	27	3.8%	32	3.5%	0.5%
Total	702	100.0%	903	100.0%	14.3%

Taking a close look at board diversity across all ethnic categories, black and Hispanic directors account for 10.6% of all board seats. In addition, directors of Asian, Indian, or Middle Eastern ethnicity occupy 2.0%, 1.3% and 0.5% of all board seats, respectively. The male to female ratio of board seats held by whites is 4.0:1; 4.8:1 for Hispanic directors; 6.2:1 for Indian directors; and 4.3:1 for Middle Eastern directors. It is significantly more balanced among black directors at 2.4:1, and Asian Directors at 1.9:1.

Diversity Composition of All Board Seats						
Race	Male Seats		Female Seats		Total Seats	
	#	% of All Seats	#	% of All Seats	# Seats	
White	4,315	68.4%	1,086	17.2%	5,401	85.7%
Black	328	5.2%	134	2.1%	462	7.3%
Hispanic	171	2.7%	36	0.6%	207	3.3%
Asian	81	1.3%	42	0.7%	123	2.0%
Indian	68	1.1%	11	0.2%	79	1.3%
Middle Eastern	26	0.4%	6	0.1%	32	0.5%
	4,989	79.1%	1,315	20.9%	6,304	100.0%
Non-White	674	10.7%	229	3.6%	903	14.3%
						M:F Ratio

Approximately half of ethnic professionals serving as directors have P&L responsibility: 54% are Chairmen/CEOs, with the balance heading business units within companies: 16% are in corporate staff roles (finance and marketing); 18% have backgrounds in outside business advisory roles (lawyers, consultants and investment professionals); and 11% have government and academic backgrounds.

The industries that appear to have the most ethnic diversity are Utilities, Telecommunications, and Consumer Goods. Those that appear to have the least are Healthcare, Financials, and Oil & Gas. The following chart details ethnic diversity by industry.

Ethnic Diversity by Industry		
Industry	Total Seats	Non-White
		# %
Utilities	348	69 19.8%
Telecommunications	130	23 17.7%
Consumer Goods	706	125 17.7%
Consumer Services	1,003	151 15.1%
Industrials	871	129 14.8%
Basic Materials	424	59 13.9%
Technology	607	83 13.7%
Healthcare	524	68 13.0%
Financials	1,247	155 12.4%
Oil & Gas	444	41 9.2%
Total	6,304	903 14.3%

FOOD FOR THOUGHT

While concern continues to be expressed that females and ethnic minorities are under-represented on corporate boards, there has never been a persuasive case presented for what the appropriate director balance should be. With overall board diversity now at approximately 32%, is there a cogent rationale that it should be 40% or 50%? Without a well-reasoned viewpoint, it is likely there will never be satisfaction that an appropriate balance has been reached.

We believe that a better appreciation is required of the economic principals of “supply and demand”, in terms of diversity of director-qualified talent in the fields of expertise most valued by boards. For those who desire greater diversity, the real challenge may be increasing the population of accomplished diverse executives, rather than simply increasing the percentage of diverse directors.

Appropriate Governance Capacity Guidelines & Ideal Board Weight

"IDEAL" – DOES IT EXIST?

An ideal board weight does not exist in an absolute sense. What is appropriate for one company may not be appropriate for another. However, **a company's board weight ranking should not be significantly out of sync with its revenue rank or market cap rank.** Our report focuses on large-scale companies because they cut the widest swath in our economy – accounting for the most employees, shareholders, customers, and suppliers, and as such, owe their stakeholders equally significant governance capacity.

We use three measures in assessing the quality of a board's governance capacity: 1) **Total Board Weight (TBW)** = the sum of a board's individual director weights; 2) **Average Director Weight (ADW)** = TBW divided the number of directors on the board; and 3) **Composite Weight Rank (CWR)** = an overall score based on the average of the board's TBW ranking and its ADW ranking.

What is appropriate? We certainly would not expect **Wal-Mart** (ranked #1 in revenue) and **Johnson & Johnson** (#40) to be ranked as far down as #511 and #342 in Average Director Weight, and #436 and #258 in Composite Weight Rank, respectively. Nor would we expect America's most valuable companies by market cap, such as **Alphabet** (#9) and **PepsiCo** (#28) to be ranked as far down as #451 and #346 in Average Director Weight, and #423 and #163 in Composite Weight Rank, respectively.

Conversely, to its credit, **SnapOn** (ranked #548 in revenue) is ranked #23 in Average Director Weight and #66 in Composite Weight Rank. We also commend **Emcor** (ranked #586 in market cap) and **Office Depot** (#581) for having governance capacity that ranks #14 and #18 in Average Director Weight, and #46 and #55 Composite Weight Rank, respectively.

STRENGTHENING YOUR BOARD GOVERNANCE CAPACITY

We suggest that boards attempt to **achieve rankings in each of the weight categories – Total Board Weight, Average Director Weight, and Composite Weight Rank – no lower than 50 points below their revenue rank, and/or market cap rank.** A more relaxed view might be no more than a 75-point

differential. In either case, how do the corporations in our study measure up against these standards?

of Companies with Weight Rankings Well Below Their Revenue Ranking

	Margin ≥ 50 Points	Margin ≥ 75 Points
Total Board Weight (TBW)	243	223
Average Director Weight (ADW)	277	241
Composite Weight Rank (CWR)	264	240

of Companies with Weight Rankings Well Below Their Market Cap Ranking

	Margin ≥ 50 Points	Margin ≥ 75 Points
Total Board Weight (TBW)	258	225
Average Director Weight (ADW)	276	256
Composite Weight Rank (CWR)	267	244

We also suggest the following guidelines:

- Average Director Weight of at least 7.0
- Total Board Weight of at least 70

In 2016, only 118 (24%) of America's 500 largest companies by revenue met this suggested dual standard. Similarly, only 117 (23%) of America's 500 largest companies by market cap were able to do so. **Clearly, many boards need to take a serious look at their governance capacity as they undertake director succession planning.**

Preview of Governance Scores & Companies That Distinguished Themselves

In 2016, a number of companies distinguished themselves as having boards with the best, or the worst, governance capacity scores. Movement in the ratings from one year to the next is caused principally by boardroom additions and retirements. As an additional reference point, examples of companies that achieved scores at the "median" governance capacity levels follow.

Year-to-Year Governance Capacity Comparison

	Total Board Weight		Avg. Director Weight	
	2016	2014	2016	2014
Highest Score	138	133	9.1	9.6
Lowest Score	19	21	3.2	3.1
Average	63.3	62.6	6.5	6.5
Median	63	62	6.6	6.6

GREATEST RISE & FALL IN SCORES

In 2016, the average Total Board Weight (TBW) score improved slightly from 62.6 in 2014 to 63.3. Average Director Weight (ADW) remained at 6.5. The high water mark for Total Board Weight (TBW) was recorded again by **BlackRock** at 138 with 18 directors, compared to its score of 133 in our last report. The next highest TBW was registered by **Ecolab** at 126 with 16 directors, compared to its score of 107 in our last report.

The highest ADW score was achieved by **PPG Industries** at 9.1, with 9 directors, compared to its score of 8.9 in 2014. Second was **Walt Disney** at 8.7, compared to its score of 8.1 in 2014.

Highest, Lowest, and Median Performers

	TBW Scores	ADW Scores	CWR Scores
Highest	BlackRock (138)	PPG Industries (9.1)	Baker Hughes (7.0)
Median	Clorox (63)	First Data (6.6)	CST Brands (323.5)
Lowest	SEI Investments (19)	Oaktree Capital (3.2)	SEI Investments (652)

MOVING UP & DOWN IN THE RANKINGS

A number of companies experienced dramatic change in their governance capacity rankings – both up and down. This is largely due to changes in board size, but also a result of changes in director business acumen scores as board composition changed. The companies having the greatest change in governance capacity rankings follow. (*Excluded from this analysis are the new companies that were not included in our 2014 report.*)

Greatest Movement in Governance Rankings

Greatest Increase	Company	2016 Rank	2014 Rank
Total Board Weight (TBW)	Tenet Healthcare	#211	#586
Average Director Weight (ADW)	QUALCOMM	#256	#564
Composite Weight Rank (CWR)	Tenet Healthcare	#303	#597
Greatest Decrease	Company	2016 Rank	2014 Rank
Total Board Weight (TBW)	Williams Cos.	#631	#182
Average Director Weight (ADW)	Expedia	#553	#173
Composite Weight Rank (CWR)	Williams Cos.	#612	#257

GREATEST RISE & FALL IN SCORES

It is important to note that all scores were determined based on the directors listed in proxy filings and on corporate websites. Our analysis might have caught some boards in a transition, having lost directors and not yet elected their replacements.

Governance rankings fall where they may, but governance scores are well within the control of the board. The chart below illustrates the top three companies in each governance category that experienced the greatest increase or decrease in their scores. (*Excluded from this analysis are the new companies that were not included in our 2014 report.*)

Greatest Movement in Governance Capacity Scores				
<u>Greatest Increase</u>				
	<u>Company</u>	<u>2016 Report Score</u>	<u>2014 Report Score</u>	<u>Change</u>

2016 BOARD WEIGHT & GOVERNANCE CAPACITY OBSERVATIONS & FINDINGS

2016 BOARD WEIGHT & GOVERNANCE **CAPACITY OBSERVATIONS & FINDINGS**

COMPANIES ANALYZED

Our study focuses on **America's largest public companies**, encompassing the largest 500 by revenue rank and the largest 500 by market cap as of January 2016. The combined total number of companies analyzed this year is 652. These companies generally command the greatest investor attention, employ the most people, and set the governance tone for other companies.

The **6,304 directors** analyzed are those listed in each company's proxy statement and/or website during the term of our analysis, February 2016 to July 2016. The weights accorded each director are based on our assessment of their career record as profiled in the corporate proxies and cross-checked with a number of additional reference sources.

TOTAL BOARD WEIGHT (TBW)

In 2016, Total Board Weight (TBW) ranged from a high of 138 to a low of 19. This compares to our 2014 report in which TBW ranged from a high of 133 to a low of 21. Average TBW increased from 62.6 in 2014 to 63.3.

Boards with the Greatest Governance Capacity:

The top 10 corporations in terms of Total Board Weight (TBW) range in revenue from \$4.2B to \$135.8B, and in market cap from \$10.2B to \$304.6B. They span four industry sectors. Sixty percent of these companies have 16 or more directors, with the smallest having 13 directors. The average board size for all 652 companies analyzed is 9.7. This is the fifth report in a row that **BlackRock** among the top two boards in TBW.

Heaviest Weight Boards								
TBW Rank	Company	TBW	# of Directors*	Industry	Revenue Rank	Revenue (\$B)	Market Cap Rank	Market Cap (\$B)
1	BlackRock**	138	18	Financials	241	\$ 11.3	79	\$ 52.9
2	Ecolab	126	16	Industrials	195	13.8	127	33.4
3	U.S. Bancorp	125	15	Financials	129	20.0	53	73.9
4	Nordstrom	123	16	Consumer Services	188	14.3	383	10.2
5	IBM	113	14	Technology	29	83.8	30	133.0
6	KeyCorp	113	16	Financials	520	4.2	369	10.6
7	Delta Air Lines	112	16	Consumer Services	63	40.8	110	38.8
8	Parker Hannifin	109	13	Industrials	218	12.3	290	14.2
9	General Electric	108	14	Industrials	13	135.8	4	304.6
10	BB&T	105	17	Financials	289	9.4	146	28.7

*Excludes company's active CEO (all charts/tables)
Bold indicates repeats from prior report
 ** Indicates repeats from all five years of this report

Boards with Lowest Governance Capacity:

The lowest ranked companies in terms of *Total Board Weight* (TBW) range in revenue from \$1.3B to \$15.8B, and in market cap from \$0.4B to \$9.1B. They span five industry sectors. An important factor contributing to low board weight is small board size, as well as the number of insiders serving on the board. All of these boards had 9 or fewer directors. The lightest board of America's 652 largest corporations is **SEI Investments**, with a Total Board Weight of 19.

Lightest Weight Boards								
TBW Rank	Company	TBW	# of Directors*	Industry	Revenue Rank	Revenue (\$B)	Market Cap Rank	Market Cap (\$B)
652	SEI Investments	19	5	Financials	627	\$ 1.3	447	\$8.4

Excludes companies not profiled in our 2014 study

AVERAGE DIRECTOR WEIGHT (ADW)

Recognizing that Total Board Weight can be skewed upward or downward simply based on the number of directors on a board, we examined each board's *Average Director Weight* (ADW) – the strength of business acumen of the average director on the board, as an indication of “average director governance capacity”. It is possible that large boards with a high Total Board Weight rating could be made up of many “lightweight” directors, and small boards receiving a low Total Board Weight rating could be comprised largely of only a few “heavyweight” directors. The latter, while having less “total board governance capacity”, but higher “average director governance capacity”, may actually have greater governance “effectiveness”.

The average ADW remained the same from that of 2014 at 6.5. ADW in this report ranges from a high of 9.1 to a low of 3.2. This compares to our 2014 report, when ADW ranged from a high of 9.6 to a low of 3.1.

Boards with Highest Average Director Governance Capacity:

The top 10 corporations in terms of Average Director Weight range in revenue from \$7.0B to \$186.5B, and in market cap from \$2.8B to \$178.6B. The boards range in size from 6 to 13 directors. This is the fifth year in a row that **PPG Industries** and **Parker Hannifin** have been among the top 10 boards. Ranked #1 this year, **PPG Industries**' high ADW of 9.1, with 9 directors, is derived from having four active CEOs, four retired CEOs, and one former outside Chairman on its board.

Highest Average Director Weight								
ADW Rank	Company	ADW	# of Directors*	Industry	Revenue Rank	Revenue (\$B)	Market Cap Rank	Market Cap (\$B)
1	PPG Industries**	9.1	9	Basic Materials	172	\$ 15.3	158	\$ 26.9
2	Walt Disney	8.7	10	Consumer Services	50	52.5	18	178.6
3	Baker Hughes	8.7	12	Oil & Gas	139	19.0	209	20.8
4	Micron Technology	8.7	6	Technology	163	16.2	275	15.2
5	Marathon Oil	8.6	7	Oil & Gas	361	7.0	397	9.7
6	Cameron International	8.5	10	Oil & Gas	286	9.5	335	12.0
7	Chesapeake Energy	8.4	7	Oil & Gas	198	13.7	596	2.8
8	Parker Hannifin**	8.4	13	Industrials	218	12.3	290	14.2
9	McKesson Corp.	8.4	8	Healthcare	5	186.5	97	44.2
10	Dow Chemical	8.3	12	Basic Materials	51	51.7	70	61.5

*Excludes company's active CEO (all charts/tables)
Bold indicates repeats from prior report
 ** Indicates repeats from all five years of this report

Boards with Lowest Average Director Governance Capacity:

These 10 boards range in size from 5 to 22 directors. They span five industry sectors and range in revenue from \$0.2B to \$6.5B, and in market cap from \$5.0B to \$31.1B. **United Therapeutics** has no inside directors, excluding its CEO. The remaining nine companies average five inside directors per board. The board with the lowest ADW value, 3.2, is **Oaktree Capital Group** – eight of its eleven directors have an individual score of 3.0 or less, and nine are considered insiders. This is the fifth year in a row that **Erie Indemnity Company** has been among the four lowest ranked boards. **Cablevision Systems** is on this list for the fourth time in a row.

Lowest Average Director Weight								
ADW Rank	Company	ADW	# of Directors*	Industry	Revenue Rank	Revenue (\$B)	Market Cap Rank	Market Cap (\$B)
652	Oaktree Capital Group	3.2	11	Financials	650	\$ 0.2	492	\$ 7.1
651	CME Group	3.2	22	Financials	549	3.4	135	31.1

COMPOSITE WEIGHT RANK (CWR) – A MEASURE OF OVERALL GOVERNANCE CAPACITY

To assess “overall governance capacity”, we looked at each company’s Total Board Weight rank and Average Director Weight rank. We then averaged the two ranks to calculate the *Composite Weight Rank score* (CWR), [(TBW Rank + ADW Rank) / 2]. Unlike TBW and ADW values, where the higher the value the better the ranking, **the lower the CWR score, the better the ranking**. We then ranked the boards from best CWR (#1) to worst CWR (#652) – in other words, we **ranked the Composite Weight Rank scores**. One should also note that some CWR scores are fractional numbers.

Boards with Highest Overall Governance Capacity:

Baker Hughes, ranked #139 in revenue, repeats this year having the highest overall governance capacity (CWR). It ranked #11 in TBW and #3 in ADW, with a CWR score of 7.0. Five companies have distinguished themselves repeatedly as being among America’s highest rated boards, as noted below. This is the fifth straight year that **Parker Hannifin** is among the top 10. The companies on this list span five industry sectors. They range in revenue from \$11.4B to \$83.8B, and in market cap from \$11.8B to \$133.0B. Board size ranges from 11 to 16 directors.

Highest Composite Weight Rankings										
CWR Rank	Company	TBW Rank	ADW Rank	CWR Score	# of Dir.*	Industry	Revenue Rank	Revenue (\$B)	Market Cap Rank	Market Cap (\$B)
1	Baker Hughes	11	3	7.0	12	Oil & Gas	139	\$ 19.0	209	\$ 20.8
2	Parker Hannifin**	8	8	8.0	13	Industrials	218	12.3	290	14.2
3	U.S. Bancorp	3	13	8.0	15	Financials	129	20.0	53	73.9
4	Dow Chemical	16	10	13.0	12	Basic Materials	51	51.7	70	61.5
5	3M	17	11	14.0	12	Basic Materials	89	30.7	42	95.3
6	Halliburton	18	12	15.0	12	Oil & Gas	99	27.3	133	31.6
7	IBM	5	28	16.5	14	Technology	29	83.8	30	133.0
8	WestRock	13	33	23.0	13	Basic Materials	238	11.4	345	11.8

 ** Indicates repeats from all five years of this report

Boards with Lowest Overall Governance Capacity:

The 10 companies with the lowest overall governance capacity span four industry sectors. They range in revenue from \$0.2B to \$12.1B, and market cap from \$0.7B to \$16.9B. Board size ranges from 5 to 11 directors. **SEI Investments'** board has the lowest overall governance capacity rating out of 652 companies. It ranks 652 in TBW and 648 in ADW, resulting in a CWR score of 650.0. This is the third time that **Erie Indemnity** has been on this list.

Lowest Composite Weight Rankings

CWR Rank	Company	TBW Rank	ADW Rank	CWR Score	# of Dir.*	Industry	Revenue Rank	Revenue (\$B)	Market Cap Rank	Market Cap (\$B)
652	SEI Investments	652	648	650.0	5	Financials	627	\$ 1.3	447	\$ 8.4

GOVERNANCE CAPACITY SURPRISES

One might expect that America's largest corporations – given their significant economic importance, high market value, and broad shareholder participation – would be among the top boards in governance capacity, as measured by Total Board Weight and Average Director Weight. While somewhat true, there are many surprises in our study. The tables below highlight the largest and smallest companies with the greatest disparities between their revenue rank and their ADW and TBW rankings.

Of the 100 largest companies by revenue, only 41% have a top 100 TBW ranking, and only 27% have a top 100 ADW ranking. Surprisingly, 31% of the largest 100 companies are ranked lower than 250 in TBW, and 49% are ranked lower than 250 in ADW.

Conversely, of the 100 smallest companies by revenue, only 33% have a TBW rank in the bottom 100, and only 17% have an ADW rank in the bottom 100. 14% are ranked above 250 in TBW, and 27% are ranked above 250 ADW ranking.

TBW Total Board Weight
 ADW Average Director Weight

DIFFERENCES IN GOVERNANCE CAPACITY BY REVENUE SIZE

Smaller companies tend to have smaller boards, which skews their TBW lower. Companies ranked 1 to 100 by revenue had boards that averaged 10.8 directors, while companies ranked 553 to 652 averaged 8.5 directors. As a result, average TBW declined steadily from 74.5 for the largest 100 companies by revenue, to 53.4 for the smallest 100. Average ADW also declined from 6.9 to 6.3, respectively, suggesting that smaller companies tend to staff their boards with directors of somewhat lesser business acumen.

The TBW and ADW averages by market cap rank paralleled that of the revenue rankings. As market cap declines, average board size declined from 11.0 to 8.8, and TBW declined from 75.7 to 55.7. ADW also drifted lower from 6.9 to 6.3, suggesting that companies of lesser market value are perhaps less able to attract directors of higher business acumen.

Averages by Revenue Rank				Averages by Market Cap Rank			
Revenue Rank	Average Board Size	Average TBW	Average ADW	Market Cap Rank	Average Board Size	Average TBW	Average ADW
1 - 100	10.8	74.5	6.9	1 - 100	11.0	75.7	6.9
101 - 200	10.3	68.3	6.6	101 - 200	10.4	68.8	6.6

401 - 500	9.2	58.9	6.4	401 - 500	9.1	57.8	6.4
501 - 652	9.0	56.8	6.4	501 - 652	8.9	56.4	6.4

DIFFERENCES IN OVERALL GOVERNANCE CAPACITY BY INDUSTRY SECTOR

Recall that overall governance capacity (Composite Weight Rank score) is an average of the TBW and ADW rankings; therefore the lower the CWR score, the better the overall governance capacity. The heaviest industries in overall governance capacity are Basic Materials and Consumer Goods. The lightest industries are Telecommunications and Oil & Gas. On average, the largest boards are in the Financial sector, while the smallest boards are in Oil & Gas.

Industry Sector	Overall Governance Capacity by Industry Sector									
	Overall Governance Capacity				Averages by Industry					
	Avg.	Rank	# Cos.	Rank	# Directors*	Avg.	Rank	Avg.	Rank	
Basic Materials	241	1	43	8	9.9	4	69.7	1	7.0	1

TBW Total Board Weight

ADW Average Director Weight

DIFFERENCES IN GOVERNANCE CAPACITY BY GEOGRAPHIC REGION

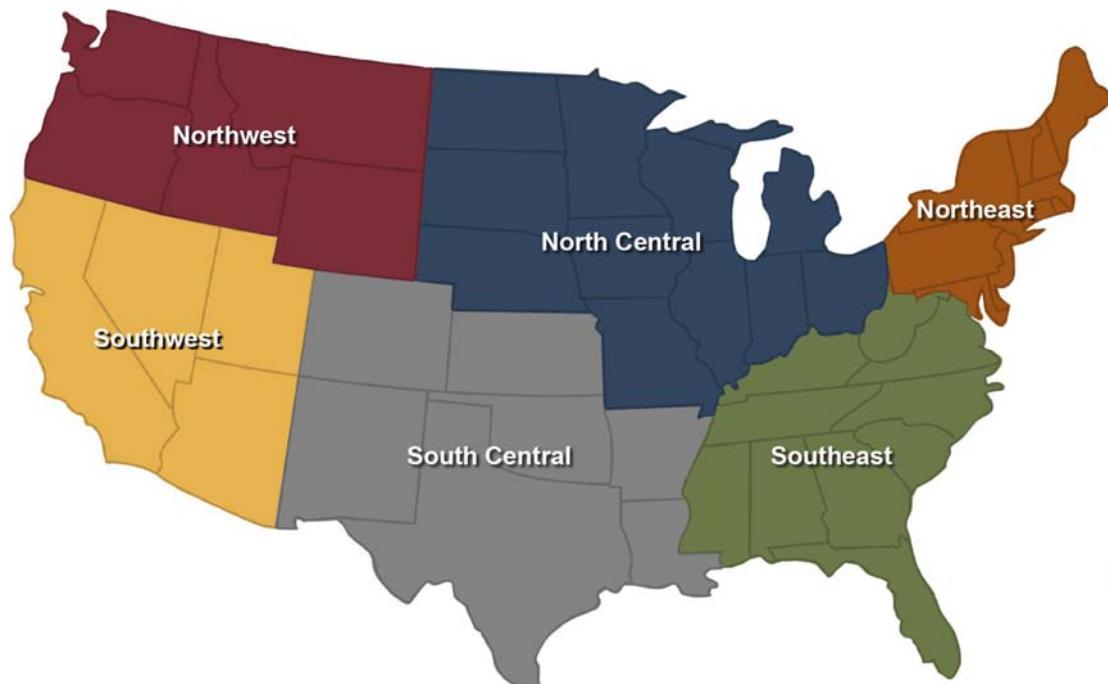

There are wide differences in our statistical averages across geographic regions. Boards are largest in the Northwest with an average of 10.7 directors, and smallest in the South Central and Southwest regions, with an average of 8.9 directors.

Total Board Weight is highest in the Northwest region with an average of 71.3, closely followed by the North Central region at 68.2. It is lowest in the South Central region, with an average of 55.5. Average Director Weight is highest in the Northwest and North Central regions, averaging 6.7, and lowest in the South Central region at 6.3. Overall governance capacity or Composite Weight Rank is the best in the Northwest region averaging 262, and worst in the South Central region averaging 415.

Governance Capacity by Region							
Geographic Region	Total # of Companies	Average Revenue (\$B)	Average Market Cap (\$B)	Average Board Size	Average TBW	Average ADW	Average CWR Rank
Northeast	186	\$16.6	\$31.5	9.9	63.6	6.4	334
Southeast	173	16.5	21.5	9.6	63.5	6.6	320
North Central	143	20.7	22.9	10.1	68.2	6.7	271
South Central	35	23.7	15.3	8.9	55.5	6.3	415
Northwest	15	38.0	81.4	10.7	71.3	6.7	262
Southwest	100	16.9	41.5	8.9	57.2	6.4	383

IMPROVING YOUR GOVERNANCE CAPACITY RATINGS

IMPROVING YOUR GOVERNANCE CAPACITY RATINGS

Historically, when boards are considering the recruitment of a new director and defining the ideal director specification, they typically ask two questions:

- If a director retirement is pending, does the board need to recruit a director with a similar background to replace the expertise lost and fill vacated committee roles?
- If a board audit has been performed to determine requisite director expertise (based on strategic objectives and business challenges), is there a perceived gap that the new director must fill?

As neither of the above addresses the board's governance capacity, we recommend that a third consideration be included in the discussion: **Given the company's governance capacity ratings, relative to its stature, should the next director be selected such that the board's governance capacity will be enhanced?** Such a step might communicate a commitment to protecting shareholder interests and achieving higher shareholder returns.

For your governance capacity to exceed expectations, your ADW and TBW rankings should be higher than your revenue rank. Our share price performance analysis suggested in past years that the greater the positive margin of difference, the greater the possibility of **superior shareholder return**. We do recognize that the largest companies (top 50) are closer to the revenue rank ceiling and have less head room for a significantly positive margin of difference.

If exceeding expectations is not your goal, there are two other litmus tests to determine if your board is at least in line with expectation standards.

1. Do Your Scores Meet / Exceed Highly Respected Governance Standards?

Achieving highly respected governance capacity starts first with managing and maintaining your Average Director Weight score (ADW); we recommend an ADW of 7.0, or greater. At that level, the board has a significant complement of directors with high business acumen including corporate CEOs and other senior business executives, as well as accomplished leaders from other professional fields.

2. Do Your Rankings Achieve Acceptable or Minimal Standards?

If you strive for an **acceptable standard** of governance capacity, your ADW and TBW rankings should be no more than 50 points below your revenue rank. The margin for a **minimum acceptable standard** of governance capacity is no more than a 75-point difference.

SETTING YOUR STANDARD

If a board agrees upon a target ADW of 7.0, the minimum TBW target with 10 directors would be 70. If the board is larger, e.g., 12 directors, minimum TBW would be 84. For a smaller board of 8, it would be 56. While partly a function of board size, we believe that TBW itself is a valuable indicator of the substantive depth of governance capacity in the boardroom. **Companies of significant size, such as America's largest 1000, should assure shareholders that they meet the minimum threshold of TBW governance capacity.**

For boards of eight or fewer directors, we suggest a minimum TBW of 56. However, if America's largest companies have boards of fewer than eight, we believe that such a board size is insufficient for competent oversight. Our report suggests there is reason for concern in this regard: 14% (91) of the companies analyzed have boards of seven or fewer directors, and 34% (221) have TBW of less than 56.

If a board has fewer than eight directors, its ADW by necessity would have to be higher than 7.0 to compensate and meet the minimum governance capacity objective of 56 TBW. Seven boards in our report have only four or five directors and are too small to achieve the required TBW score without expanding their size.

Board Size	Minimum TBW	Required ADW to Achieve Minimum TBW
7	56	8.0
6	56	9.3
4 - 5	56	Not feasible

Governance Capacity Improvement Guide

BE AMONG THE BEST

If you believe in the value of having a board of high business acumen, or governance capacity, and wish to be in the upper ranks of companies regarded as such, consider the chart to the right. If your governance capacity is not consistent with our guidelines, or your expectations, you may wish to consider enhancing the mix of business acumen on your board.

The following worksheet provides a step-by-step analysis to attain a better understanding of where your board is today compared to others, where it would ideally like to be, and a path to get there. (*This worksheet is also available on our website.*)

2016 Governance Peer Groups "In which group would you like to be?"

Group Rankings	ADW Range	TBW Range
Top 1 - 50	9.1 - 7.8	138 - 87
51 - 100	7.8 - 7.5	86 - 79
101 - 150	7.5 - 7.3	79 - 74
151 - 200	7.3 - 7.0	74 - 71
201 - 250	7.0 - 6.9	71 - 67
251 - 300	6.9 - 6.6	67 - 64
301 - 350	6.6 - 6.5	64 - 61
351 - 400	6.5 - 6.3	61 - 57
401 - 450	6.3 - 6.1	57 - 55
451 - 500	5.1 - 5.9	54 - 52
Bottom 501+	5.9 - 3.2	52 - 19

Worksheet

Let's get started.

STEP 1: Review Your Scores vs. Minimum Standards (Litmus Test 1):

If your company is among the 652 largest companies analyzed in this report, locate your company's governance capacity scores and record them below. (*An alphabetical guide of all analyzed companies is provided on page 41*). Does your board appear to be in line with expectations in terms of minimum standards?

Company: _____	Revenue Rank: _____	# of Directors: _____ (<i>Excluding company's CEO</i>)	
	Governance Scores	Minimum Standard (Average Board = 10 directors)	Meet/Exceed Standard?
Average Director Weight (ADW)	_____	7.0	Y/N
Total Board Weight (TBW)	_____	70	Y/N

As we recommend a minimum ADW score of 7.0 for most boards, you may wish to calibrate your TBW minimum standard by multiplying the number of your directors (excluding the company's CEO) by 7.0, if you have more than or fewer than 10 directors.

STEP 2: Review Your Scores vs. Acceptable Standards (Litmus Test 2):

Another benchmark is to determine whether your rankings are in line with expectations considering your company's stature, as measured by revenue rank. Ideally, your board satisfies both litmus tests, or at least one.

<u>Your Governance Capacity</u>				
ADW Rank	Score Rank	Revenue Rank	Margin (Score - Revenue Rank)	High Standard (Margin <50?)
_____	_____	_____	_____	Y/N
TBW Rank				Y/N
				Y/N

Depending upon steps 1 and 2, you may be satisfied that your governance capacity is exactly where you would like it to be. Or you may have concluded that you wish to improve your governance capacity. It may be a simple matter of achieving compliance with one or both of the litmus tests. Or you may have a higher objective: to attain parity with other boards in the upper ranks of governance capacity (see above "Governance Peer Groups" chart).

STEP 3. Design the Ideal Board Profile

If improving governance capacity is the objective, use the following form to chart the course. Fill in your “current profile” information, and record the appropriate business acumen category and weight value for each of your directors, referring to our Director Weight Values chart on page 4 of this report (exclude your CEO). Total the individual director weights to calibrate Total Board Weight (TBW), and divide by the number of directors (excluding your CEO), to calibrate your Average Director Weight (ADW). Select an ADW you aspire to achieve, considering not only the minimum ADW standard of 7.0, but also where you would like to rank among all companies, referencing the “Governance Peer Groups” chart on the prior page. To help visualize what your board composition might need to look like in order to move in a new direction, refer to the three board profiles shown below as examples of high, average, and modest governance capacity. You can now create a roadmap to achieve your ideal board profile.

YOUR BOARD					
Current Profile			Desired Profile		
# of Directors:	_____		Desired # of Directors:	_____	
ADW Score:	_____		Target ADW Score:	_____	
ADW Rank:	_____		ADW Peer Group Range:	_____

**CLOSING REFLECTIONS
&
OFFICIAL 2016 BOARD WEIGHT RANKINGS**

CLOSING REFLECTIONS

As we conclude our 5th governance study, we are more convinced than ever that strong governance capacity is the high-octane fuel in the engine. It is the able leadership of the board chairman and committee heads that catalyzes this precious fuel in a manner that fosters governance strength, quality, and effectiveness.

Our principal interest is to provide a thoughtful benchmark by which the integrity of a board's governance system can be measured. Too often, boards receive undeserved criticism for ineptitude, and are held accountable for flawed business execution that is not their responsibility. It is not appropriate to make the board the "whipping post" for all that goes wrong in a corporation. If a board's high governance capacity rating causes some critics to think twice before "firing a shot", we have accomplished one of our goals. Conversely, if a board of low governance capacity becomes the focus of critical scrutiny, it may deserve closer attention.

We do not anticipate that all corporate boards will embrace our study. But we hope that we can all agree – **greater governance capacity, no matter how one measures it, is good for business.**

Just as with other qualitative rating systems, such as *Fortune's* "Most Admired Companies" and *Bloomberg Businessweek's* "Business School Rankings and Profiles", there will be companies that feel good about the rankings, and others that do not, and will perhaps dismiss the validity of our methodology. However, for those companies that take the time to consider our logic, perhaps during the annual cycle of considering the composition of their own boards, this study will have served a purpose.

In the future, companies seeking to strengthen their "board weight" or "governance capacity" rankings can take two simple steps:

- **Enlarge the board if it is too small**, considering the company's business scale, reputation, and strategic opportunities.
- **Upgrade boardroom talent by adding directors of more substantive business accomplishment**, particularly if active and retired CEOs are under-represented on the board.
